eLock

revolutionizing *electronic access control* for general cabinetry and appliances

CompX eLock® is available in six versions

All six versions are available in keypad, proximity and magstripe card readers.

➡ **eLock only** – for use with solenoids and/or electric door strikes

➡ **cabinet eLock kit** – standalone security on any door or drawer

➡ **refrigerator kit** – security for any appliance

➡ **horizontal mount refrigerator kit** – security for any appliance with side locking capability

➡ **temperature monitoring refrigerator kit** – temperature monitoring and security for any appliance -40˚F to 122˚F (-40˚C to 50˚C)

➡ **temperature monitoring only** – programmable with alarm capability

LockView® Software can be used with all versions of eLock, providing **audit trails** for access attempts and **temperature logs**, as well as programming and managing user databases.
