

# Thank you for choosing the *new* CompX eLock® horizontal mount. **CompX eLock®**

CompX eLock® is a highly engineered lock with a motor-driven latch. Its uncompromising lock control electronics include a non-volatile memory that stores 250 user / supervisor codes and audit trail. With optional LockView® audit trail software, CompX eLock® remembers 1500 access attempts. Programming is simple with numeric keypad or Windows™ based LockView® software.

## Quick Programming Guide

### 1. GETTING STARTED:

- The unit is shipped with no user / supervisor codes
- Press and hold **#** until the beeping stops
- Input the new PIN (4 digit min) and press **#** or present new card
- This PIN / Card is now a supervisor in slot #001

### 2. ADD A USER:

- Input a valid supervisor PIN and press **#** or present valid supervisor card
- Press and hold **#** until beeping stops
- Input the new user PIN (4 digit min) and press **#** or present new card

### 3. ADD A SUPERVISOR:

- Input a valid supervisor PIN and press **#** or present valid supervisor card
- Press and hold **#** until beeping stops
- Press and hold **#** again until beeping stops
- Input new supervisor PIN (4 digit min) and press **#** or present NEW supervisor card

### 4. DELETE A USER OR SUPERVISOR:

- Input a valid supervisor PIN and press **#** or present valid supervisor card
- Press and hold **\*** until beeping stops
- Input the PIN to be deleted and press **#** or present existing card to be deleted

### 5. ADD A USER WITH A SPECIFIC SLOT ASSIGNMENT:

- Input a valid supervisor PIN and press **#** or present valid supervisor card
- Press and hold **#** until beeping stops
- Enter slot number that will be assigned to user and press **#**  
(example: to program slot 6 type 006 **#**)
- Input the new user PIN (4 digit min) and press **#** or present NEW card

### 6. DELETE A USER WITH A SPECIFIC SLOT ASSIGNMENT:

- Input a valid supervisor PIN and press **#** or present valid supervisor card
- Press and hold **\*** until beeping stops
- Enter slot number to be cleared and press **#** (example: to clear slot 6 type 006 **#**)
- Enter slot number to be cleared again and press **#** (example: to clear slot 6 type 006 **#**)

See programming guide included with optional **LOCKVIEW®** software for advanced programming instructions.

### What's in the box?

- 8 - #8 tamper resistant .5" screws
- 2 - #8 tamper resistant 3/8" screws
- 1 - strike plate
- 1 - strike plate cover
- 1 - CompX eLock® instruction sheet
- 3 - double-sided tape 7.5" X 1"
- 1 - complete eLock horizontal mount refrigerator kit (batteries not included)
- 1 - series of serial code stickers (keep in a safe place)
- 1 - factory reset card (magstripe or prox units only)

### What's needed?

- T15 pin-in-head torx tool
- 6 - AA batteries
- tape measure (or ruler)
- drill (if doing drilling installation)

# Installing the Horizontal Mount Refrigerator Kit

CompX eLock®

## Step 1: Install the strike

There are two main parts of this installation: installing the strike and installing the eLock assembly. The strike and the eLock assembly can be mounted either with foam tape or by drilling holes and using screws. It is important to note that mounting the strike and the eLock assembly are independent of each other. One can be foam tape mounted, and one can be drill mounted if desired. The two do not need to be mounted using the same method.

### Foam Tape Installation: Option A

Please note that if foam tape installation of the strike is used, the strike will **not** be adjustable once it's put in place.

- Clean side and front of both the refrigerator and the strike with rubbing alcohol. Wait for the alcohol to dry.
- Along the non-hinged side of the refrigerator, make a mark 6-15/16" from

the front edge of door and a minimum of 3-1/2" from the top. Measure from this line to the front of the cabinet (dim. "A"); cut a piece of tape this length.

- Remove tape backer and apply tape. Line up end of strike with the 6-15/16" mark on side of refrigerator. Ensure strike is level, and apply using firm pressure. Install plastic strike cover on metal strike. Proceed to step 3.

### Drilling Installation: Option B

- Before drilling, verify that there are no refrigerant lines inside the side of the refrigerator.
- Drill a 9/64" hole, 6" back from the edge of the front of the refrigerator door and at least 3.5" from the top of the non-hinged edge of the refrigerator.

## Step 2: Secure the strike and attach the strike cover

- Screw one tamper resistant sheet metal screw into the center of the strike's slotted area. **Note: The end of the metal strike needs to curve out.**
- Place the plastic strike cover over the metal strike.
- Attach with one tamper resistant machine screw.

# Installing the Horizontal Mount Refrigerator Kit *continued*

Step

3:

## Mount the CompX eLock<sup>®</sup> housing to the refrigerator door

The CompX eLock<sup>®</sup> housing can be mounted to the front of the refrigerator either by using foam tape or by drilling holes.

### Foam Tape Installation

Please note that if foam tape installation is used, the housing will **not** be adjustable once it's put in place.

- Click CompX eLock<sup>®</sup> onto strike, ensuring proper latch bolt engagement.
- On the back of the housing, apply one piece of double-sided tape on each side – top/bottom or left/right.
- Remove liner from double-sided tape.
- Carefully press the housing onto the center of the strike.

### Drilling Installation

- Click CompX eLock<sup>®</sup> onto strike, ensuring proper latch bolt engagement.
- Center it on the strike.
- Drill six 9/64" holes through the housing into the refrigerator door for the mounting screws. Secure with screws.

**Note:** If foam tape was used to mount the strike, the CompX eLock<sup>®</sup> refrigerator kit installation is **COMPLETE**. The CompX eLock<sup>®</sup> may now be used.

Step

4:

## Finish installation of the strike (ONLY if drilled installation of strike was used)

- Remove the plastic cover from the strike plate. Drill 9/64" hole in second opening of strike.
- If adjustment of strike is needed, loosen up the first strike screw and adjust the strike. Tighten up the screw.
- Drill hole for second screw and install.
- Reattach the plastic strike cover and secure with two tamper resistant machine screws.

## LockView® software

- Add, edit, view and delete users / supervisors and their credentials
- Add, edit and delete CompX eLocks®
- Assign access rights between users / supervisors and CompX eLocks® in the database
- USB connection required
- Download, view, save, print, archive and delete audit trails
- Dual credential access available
- Set real time clock
- Time based access restrictions
- Create user groups
- Windows™ based
- View Temperature Logs\*
- View Temperature Graphs\*
- Edit Temperature Settings\*

# CompX eLock® Warranty Card

These stickers are included with each CompX eLock® unit. Please review the information and keep the stickers in a safe location as they may be needed to reset or identify a specific eLock unit. The codes shown here are not real codes. They are representations of what the stickers will look like.

**Sticker #1**

2d bar code. Provides the same information as sticker number three, but a 2d laser scanner is needed to decode the information.

**Sticker #2**

1d bar code. Place this sticker on or around the CompX eLock® unit to help identify which codes to use if resetting the lock is necessary.

**Sticker #3**

**Keep this sticker in a safe location.**

- Serial #:** Needed to identify CompX eLock® units.
- Passcode:** Unique to lock. Needed for LockView. Prevents unauthorized LockView use.
- User Rst:** Allows administrator or owner to erase all user codes from eLock unit but keep supervisor codes.
- Fact Rst:** Erases all codes from eLock, including settings. eLock unit will need to be set up again after Factory Reset (see page 2).
